Shipping Container Connections

Parts Catalogue
Vertical Container Connections

**Double Ended Twist Lock**

Double Twist Locks are used to connect two containers together vertically.

Part Number: CHDTL

**Semi Automatic Twist Lock**

Semi automatic Twist Locks can be pre loaded and will shut automatically when a container is placed on them. These twist locks are also rated and marked for a 10T lifting capacity.

Part Number: CHSATL

**Fully Automatic Twist Lock**

Fully Automatic Twist Locks have a fully automatic locking / unlocking function when loading and unloading containers.

Part Number: CHFATL

**Transverse Double Ended Twist Lock**

The transverse double ended twist lock allows the stacking of containers at 90° to each other.

Part Number: CH90DTL
Horizontal Container Connections

**Bridge Clamp**
Bridge Clamps are used to clamp containers together horizontally.

Part Number : CHBC1

**Horizontal Twist Lock**
Horizontal twist locks are used to connect containers together horizontally.

Part Number : CHHTL

**Twist Lock 2 Way Joiner**
Twist lock 2 Way joiners are used to connect two double stacked containers together horizontally where you may not be able to get a Bridge Clamp in place. They are used in conjunction with the CHDTL.

Part Number : CHTL2WJ

**Twist Lock 4 Way Joiner**
Twist lock 4 Way joiners are used to connect four double stacked containers together horizontally where you can not get a Bridge Clamp in place. They are used in conjunction with the CHDTL.

Part Number: CHTL4WJ
Container Transport Connections

**Truck Twist Lock—Short Handle**
Designed to be installed in a truck or trailer bed to allow connection of shipping containers

Part Number: CHTTL-SH

---

**Truck Twist Lock—Long Handle**
Designed to be installed in a truck or trailer bed with higher than normal side rails or strap rails

Part Number: CHTTL-LH

---

**Truck Twist Lock—Long Pin**
Designed to be installed in a truck or trailer bed with raised side rails.

Part Number: CHTTL-LP

---

**Truck Twist Lock—Tilt Tray**
Designed to be installed in tilt tray truck beds where the twist lock needs to be lowered while the container is still on the truck.

Part Number: CHTTL-TT
Structural Connections

**Weldable Twist Lock**
Can be welded to any structure to allow shipping container connection

Part Number: CHWTL

---

**Transverse Weldable Twist Lock**
Has the locking head 90 degrees compared to the standard Weldable Twist Lock

Part Number: CHTWTL

---

**Weldable Cone**
The weldable cone is a non locking device used for horizontal container location.

Part Number: CHWC

---

**Boltable Twist Lock**
Can be bolted to any structure to allow shipping container connection

Part Number: CHBTL
Total Container Lock

This lock is the ultimate level of security for your shipping container, it stops anyone from stealing your container even if they have a crane, side loader or hyab. The security of your container is assured once these units are installed.

Part Number: CHTLL

Container Security

Corner Casting
