Shipping Container Connections

Parts Catalogue
Fully Automatic Twist Lock
Fully Automatic Twist Locks have a fully automatic locking / unlocking function when loading and unloading containers.

Part Number: CHFATL

Double Ended Twist Lock
Double Twist Locks are used to connect two containers together vertically.

Part Number: CHDTL

Semi Automatic Twist Lock
Semi automatic Twist Locks can be pre loaded and will shut automatically when a container is placed on them. These twist locks are also rated and marked for a 10T lifting capacity.

Part Number: CHSATL

Transverse Double Ended Twist Lock
The transverse double ended twist lock allows the stacking of containers at 90° to each other.

Part Number: CH90DTL
Horizontal Container Connections

**Bridge Clamp**

Bridge Clamps are used to clamp containers together horizontally.

Part Number: CHBC1

**Horizontal Twist Lock**

Horizontal twist locks are used to connect containers together horizontally.

Part Number: CHHTL

**Twist Lock 2 Way Joiner**

Twist lock 2 Way joiners are used to connect two double stacked containers together horizontally where you may not be able to get a Bridge Clamp in place. They are used in conjunction with the CHDTL.

Part Number: CHTL2WJ

**Twist Lock 4 Way Joiner**

Twist lock 4 Way joiners are used to connect four double stacked containers together horizontally where you can not get a Bridge Clamp in place. They are used in conjunction with the CHDTL.

Part Number: CHTL4WJ
Container Transport Connections

**Truck Twist Lock—Short Handle**
Designed to be installed in a truck or trailer bed to allow connection of shipping containers.

Part Number: CHTTL-SH

---

**Truck Twist Lock—Long Handle**
Designed to be installed in a truck or trailer bed with higher than normal side rails or strap rails.

Part Number: CHTTL-LH

---

**Truck Twist Lock—Long Pin**
Designed to be installed in a truck or trailer bed with raised side rails.

Part Number: CHTTL-LP

---

**Truck Twist Lock—Tilt Tray**
Designed to be installed in tilt tray truck beds where the twist lock needs to be lowered while the container is still on the truck.

Part Number: CHTTL-TT
**Structural Connections**

**Weldable Twist Lock**
Can be welded to any structure to allow shipping container connection.

Part Number: CHWTL

**Transverse Weldable Twist Lock**
Has the locking head 90 degrees compared to the standard Weldable Twist Lock.

Part Number: CHTWTL

**Weldable Cone**
The weldable cone is a non locking device used for horizontal container location.

Part Number: CHWC

**Boltable Twist Lock**
Can be bolted to any structure to allow shipping container connection.

Part Number: CHBTL
Container Connections

**Corner Casting**
Corner Castings are the generic items used to allow connection of shipping containers to other objects.

Part Numbers:
Top: CHCCTL, CHCCTR, CHCCBL, CHCCBR

---

**Total Container Lock**
This lock is the ultimate level of security for your shipping container, it stops anyone from stealing your container even if they have a crane, side loader or hyab. The security of your container is assured once these units are installed.

Part Number: CHTLL

---

**Container Spacing**

**Container Spacer**
Allows you to safely create a space between you container vertically.

Part Number: CHCS1
Container Footing Connections

**Side Twist Lock**
Allows your container to be bolted to a slab or footing without the need to move the container.

Part Number: CHSTL

---

**Boltable Twist Lock**
Allows your container to be bolted to footing either using embedments or retrofitted anchor bolts.

Part Number: CHBTL

---

**Twist Lock Footing Posts**
A cast in post allowing a shipping container to be connected to a concrete footing at a specified height above the ground.

Part Number: CHBTL + CHFP2
Horizontal Container Movement

**Container Corner Trolley**
Allows you to easily move a container on flat surfaces. Connects directly to the bottom corners of your container. Each has a 1 tonne WLL so giving a combined 4 tonne WLL when using one in each corner.

Part Number: CHTR1T

---

**Container Castor Wheel**
Allows you to easily move a container on flat surfaces. Connects directly to the bottom corners of your container. Each has a 3 tonne WLL so giving a combined 12 tonne WLL when using one in each corner.

Part Number: CHC1-3T

---

Tandem Container Lifting

**Lifting Twist Lock**
Load rated for lifting purposes. Allows you to top lift double stacked empty containers.

Part Number: CHSATL
Who are we:
We are the largest specialized supplier of shipping container connection devices to the Australian market

Where are we:
We have three outlets being Sydney, Adelaide and Perth but can (and do) deliver anywhere in Australia generally within 2-3 working days

Contact us:
We are contactable via phone or e-mail, if we don’t know the answer our engineering team will.
